

khaled mossad

Frontend developer

✉ khaledmossad221@gmail.com ☎ 01069975145 📍 Mansoura, Egypt 🌐 LinkedIn 🐙 github.com

Profile

Front-End Developer specializing in React.js, TypeScript, and modern web technologies, with hands-on experience building responsive and interactive web applications. Skilled in developing clean user interfaces, reusable and scalable components, responsive layouts, API integration, and modern frontend architectures. Experienced in building real-world projects across e-commerce, management dashboards, booking platforms, and fitness applications, with a strong focus on UI/UX, performance, and delivering engaging user experiences.

Professional Experience

Front-End Developer IBGates – Mansoura, Egypt **Aug 2025 – Aug 2026**

- Developed and improved user interfaces using React.js
- Built reusable and scalable components to enhance performance
- Improved UI/UX for better user experience
- Collaborated with team members to deliver high-quality solutions
- Conducted research tasks including data collection and content preparation
- Performed data entry and basic data analysis

Projects

DRACO Luxury Streetwear Website [Live Demo](#)  **May 2026**

React.js • Vite • TailwindCSS • Framer Motion • Git • GitHub

- Developed a cinematic luxury fashion website with responsive and interactive UI experiences.
- Built reusable React components and scalable frontend architecture for modern e-commerce branding.
- Implemented smooth animations, page transitions, and responsive layouts optimized for desktop and mobile devices.

FreshCart — E-Commerce Web Application [Live Demo](#)  **Feb 2026**

React.js • Redux Toolkit • React Router DOM • Axios • Tailwind CSS • Vite

- Developed a fully responsive e-commerce web application with modern UI/UX and scalable component-based architecture.
- Implemented product browsing, search and filtering, cart and wishlist management, protected routes, multi-step checkout flow, order history, and user profile features.
- Managed global application state using Redux Toolkit and integrated REST APIs using Axios to deliver dynamic and interactive user experiences.

Investor Services Center — Management Dashboard [Live Demo](#)  **Oct 2025**

React.js • Vite • Tailwind CSS • React Router • Recharts • Axios • Lucide Icons

- Developed a responsive management dashboard for monitoring and managing investor services operations through modern and interactive data visualization interfaces.
- Built reusable UI components, dynamic routing, charts, tables, and dashboard layouts using React.js and Tailwind CSS.
- Integrated APIs using Axios and implemented responsive analytics dashboards with Recharts to enhance data tracking and user experience.

PlayBook – Sports Pitch Booking & Management Platform [Live Demo](#) 

React 19 • TypeScript • Node.js • Express • Prisma ORM • Tailwind CSS • Recharts • i18next • JWT

- Engineered a full-stack sports pitch booking platform featuring role-based portals for Players, Venue Owners, and Platform Admins.

- Implemented a reliable reservation engine with slot locking and double-booking prevention, including server-side availability validation.
- Built venue owner management features including venue/pitch management, dynamic pricing, calendar slot blocking, bookings, and revenue analytics.
- Developed a secure REST API using Node.js, Express, TypeScript, JWT authentication, bcryptjs, and role-based access control (RBAC).
- Created a responsive Arabic/English bilingual interface with RTL/LTR support using React, Tailwind CSS, and i18next.

FitPulse — Fitness & Nutrition SaaS Web Application [Live Demo](#)

React 19 · TypeScript · Vite · Tailwind CSS · React Router v7 · Recharts · Context API · Lucide React · Canvas Confetti

- Developed a feature-rich fitness and nutrition SaaS web application with responsive Arabic RTL interfaces for workout, nutrition, and personal progress tracking.
- Implemented a multi-step onboarding system using the Mifflin-St Jeor equation to calculate BMR, TDEE, daily calorie targets, and personalized macronutrient goals based on user data and fitness objectives.
- Built an interactive Live Gym Mode with set/rep tracking, personal record (PR) detection, workout progress monitoring, and automated rest timers.
- Developed a context-aware AI Fitness Coach interface that uses real-time calorie and protein data to provide personalized nutrition and workout recommendations.
- Created interactive dashboards and analytics for calorie intake, macronutrients, hydration, sleep, steps, body measurements, weight history, and progress tracking using Recharts.
- Implemented centralized state management with React Context API and LocalStorage persistence to maintain user, nutrition, workout, and progress data across sessions.

Education

Bachelor of Science in Computer Science and Engineering (Software Engineering)

New Mansoura University – Egypt

2021 – 2025

Certificates

SOC Analyst & Cybersecurity Diploma — AMIT Learning

Jul 2026 – Present

- Currently pursuing a 160-hour practical diploma focused on Cybersecurity and Security Operations.
- Covering Network Fundamentals, Linux, CompTIA Security+, Cyber Attacks, Incident Response, Digital Forensics, Threat Hunting, QRadar, and Splunk.
- Hands-on training with security tools including Kali Linux, Burp Suite, OWASP ZAP, Nmap, SQLMap, Postman, QRadar, and Splunk.
- Working on practical labs covering network security, web attack simulation, malware analysis, incident response, digital forensics, and SIEM-based threat hunting.

Front-End Development with React – Route Academy

Oct 2025 – Apr 2026

- Currently learning HTML, CSS, JavaScript, and React.js
- Building interactive and responsive web applications
- Applying best practices for clean code and UI/UX design
- Developing real-world projects using React.js

Front-End Developer Trainee Digital Egypt Pioneers Initiative (Depi)

Nov 2025 – May 2025

- Completed a 6-month intensive training program focused on front-end development
- Gained hands-on experience with HTML, CSS, JavaScript, React.js, and responsive design
- Developed multiple front-end projects with a focus on usability and clean code
- Improved teamwork, time management, and problem-solving skills through collaborative tasks and assignments

IT Intern General Authority for Investment and Free Zones (GAFI)

Aug 2023

- Participated in a one-month training program focused on general IT concepts and operations

- Gained knowledge in networking, databases, and IT support fundamentals
- Developed soft skills such as communication, documentation, and task management

Robotics Trainee Faculty of Computer Science – New Mansoura University

Jul 2022

- Trained on robotics fundamentals and programming concepts
- Worked with humanoid robots such as NAO robot
- Developed simple robotics projects and interactive tasks
- Gained experience in problem-solving and logical thinking through robotics applications

Skills

Technical Skills

- **Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js
- **Frameworks & Libraries:** React 19, React Router, Tailwind CSS, Bootstrap, Framer Motion, Recharts, Lucide React
- **State Management:** React Context API, LocalStorage Persistence
- **Tools:** Git, GitHub, VS Code, Chrome DevTools, Figma, Microsoft Office
- **Concepts:** Responsive Design, REST API Integration, Component-Based Architecture, SaaS Architecture, Authentication & Protected Routes, Data Visualization, RTL/LTR Support, UI/UX Principles, Performance Optimization

Additional Skills

- Data Entry
- Basic Data Analysis
- Research & Content Preparation

Soft Skills

- Problem Solving
- Teamwork
- Time Management
- Self-Learning

Languages

Arabic — Native/Bilingual

English — Proficient
